

How to install and run the prezi app.

On the PC:

- Right click on the "Prezi" link and choose "Save Link As..."
- Select a Destination to save the file (My Documents Folder, Desktop, etc).
- When the "fivefold-series-presentation.zip" file is finished downloading, close (or minimize) your web browser (Internet Explorer, Safari, Firefox, etc.).
- Navigate to the location where you saved the .zip file.
- Double click the icon for the file "fivefold-series-presentation.zip." You will then find a new folder titled "fivefold-series-presentation (followed by a series of numbers/letters)".
- Double click the new folder to open it.
- Inside this folder is the "data", a Mac version of the prezi app ("prezi.app"), and a PC version of the prezi app ("prezi.exe").
- Double click on the appropriate version of the application (Mac or PC).
- You may be prompted with a warning that "this application may be dependent on other compressed files in this folder. For the application to run properly, it is recommended that you first extract all files."
- Press "Extract all"
- Follow the prompts for the Extraction Wizard.
- If prompted with "This folder already contains a file named "fivefold-series-presentation...Would you like to replace the existing files?"
- Press "Yes to All"
- When the extraction wizard is finished, Click "Finish"
- It will display a new window with an unzipped folder titled "fivefold-series-presentation (followed by a series of numbers/letters).zip"
- Double click this folder.
- Again, inside this folder is a "data" folder, "prezi.app" folder (Mac version), and a Adobe Flash Icon (the PC version).
- Double click the Flash Icon.
- Then Choose "Run"
- You will now see the entire prezi presentation. Three buttons in the lower right hand corner of the screen are (from left to right) the full screen button, the back button and the forward button. Also if you hover over the right side of the prezi screen you'll see a "home" button and a zoom in (+) and zoom out (-) control.
- You can also zoom in and out on certain portions of the screen by double clicking in various locations on the prezi document.
- Have Fun.

On the Mac:

- Right click on the "Prezi" link and choose "Save Link As..."
- Select a Destination to save the file (My Documents Folder, Desktop, etc).
- When the "fivefold-series-presentation.zip" file is finished downloading, close (or minimize) your web browser (Internet Explorer, Safari, Firefox, etc.).
- Navigate to the location where you saved the .zip file.
- Double click the icon for the file "fivefold-series-presentation.zip." You will then find a new folder in this same destination titled "fivefold-series-presentation (followed by a series of numbers/letters)".
- Double click the new folder to open it.
- Inside this folder is the "data" folder (which contains all the files necessary for viewing the prezi), a Mac version of the prezi app ("prezi"), and a PC version of the prezi app ("prezi.exe").
- Double click on the Mac version of the application.
- You will be prompted that you are about to open an application that was downloaded from the Internet. Choose "Open".
- The prezi will begin loading and eventually you will see the entire prezi presentation. Three buttons in the lower right hand corner of the screen are (from left to right) the full screen button, the back button and the forward button. Also if you hover over the right side of the prezi screen you'll see a "home" button and a zoom in (+) and zoom out (-) control.
- You can also zoom in and out on certain portions of the screen by double clicking in various locations on the prezi document.
- Have Fun.
